

Ariba Approval Rules - Full (Including Food)

This document provides a comprehensive overview of the Ariba Approval Rules, incorporating all rules including those related to food commodities. Each entry specifies the approval workflow based on commodity, region, cost range, and hierarchical levels of approvers. The 'AribaModule' column clearly indicates which Ariba module-such as Contract Management, Procurement, or Sourcing-is responsible for handling the rule. This ensures precise alignment of business processes across modules.
